

Flower and Butterfly

Nandakumar K S

Indian Institute of Science (IISc)
Bangalore

Flower, you have become
One of the dearest few
The other day we met
And I came to know you
I don't know what to say
It wouldn't be new
After all we will be friends
And we will be dear ones
As we wish
Like old pals even if it is new
You are a flower so nice
The honey and the dew
The petals and the pollen
The color and the smell
I feel I already knew
What can I ever say!
The words are so few
So remember me always
A heart now you know
And a heart you now felt
And I am now yours
For everything you wish
I decided not to leave you
I decided to live to love you
Wherever you are
For ever for ever
