NEHU, Tura

Otiose atoms pack this capsule of a body.
Odorous drains waft into the squared room.
Tending the adenium in the balcony
Of a concrete erection
In this lego replicated city,
Trombonic notes float; the irk
Escalated by calid abstruse spaces,
Remains unparalleled to the sound of a rustic flute.
A haboob of life's unfulfilled coveted emprises
Blows over the settlement of mobile cadavers;
Ditching an evanescence of verdure fantasy.
